

Works on iOS (iPhone®, iPod® touch, iPad®), Android, BlackBerry, Windows and Palm smartphone platforms.

FAST RESPONSE

When a smoke machine at a school prom caused a student to have a serious asthma attack, PrincipalM+ became the belle of the ball. One of the girl's friends had the inhaler, so Principal Theo Kerhoulas pulled up the friend's photo in PrincipalM+ on his mobile device, showed it to some nearby kids, and dispatched them to bring him the inhaler.

"Everything worked out, but I would hate to think what would have happened if it wasn't for PrincipalM+."

Theo Kerhoulas, Principal
Croswell-Lexington High School, Michigan

EASY SET-UP

When Eastern School District in PEI installed PrincipalM+ they appreciated the ease of installation and setup.

"Now our high school administrators use it everyday in the hall to check student schedules and to enhance school security, allowing us to be more engaged with our students. We also find it to be a great use during field trips. We can quickly access student data from anywhere in an emergency."

Sean Cain, IT Data Specialist
Eastern School District, PEI

Keep track of your students when it matters most.
Affordable, anytime-anywhere access to student information.

Why Use PrincipalM+?

- ▶ Save time with quick and easy mobile access to student data
- ▶ Enhance school security

- High level of security, encryption and powerful password controls.
- System Administrators can filter data access
- Flexible SIS integration
- Easy end user support

School Security Guards and SROs:

- Identify students/staff instantly
- Respond to emergencies and crisis strengthen school security

After our school administrators began using Principalm+ on their BlackBerry devices the results were overwhelming. I have seen a significant reduction in problematic calls from the school users and increased job efficiency in my own position because of it! Our school administrators now access their student information anytime, anywhere, with fresh data every morning. ”

Tim Taylor, Supervisor of Technology, Shenandoah County Public Schools, Virginia

Key Features

- ▶ Back-up emergency student data database
- ▶ Exporting data from your school's SIS is easy, automatic and secure

Discovery Software is the developer of Principalm+ handheld solution. Used by thousands of schools and districts in North America, Principalm+ provides mobile, secure and instant access to student data for school security and enhanced student safety. School staff can access student data including photos, medical and legal notices, grades, attendance, and schedules. Principalm+ works with virtually all Student Information Systems on the market, and on a variety of handhelds. 'Always on' security and technology ensures that student data is available even when there is no power or wireless access.
